

Introducing...

(patent pending)

The innovative *SPECTester* measures your sample, of *up to 6 unique components* and, with a touch of the finger, reports *how much* as well as *why* your material is segregating. Fully automated, it provides data about: component concentrations, particle size differences, product uniformity, and *up to 4 specific segregation mechanisms*. This segregation tester can be used in R&D facilities as well as in production plants for on-the-spot, mid-stream quality control.

Materials of different sizes, shapes, colors and/or chemical composition

The SPECTester handles them all

Touch Screen Data Entry
Fast Graphical and Numerical Results
UBS Thumb-drive (included)
for Reporting Excel-ready data

3 component Mixture
